

Vieer Dwivedi

DevOps Engineer | DevSecOps | Cloud Engineer

+91 7045308204 | vieerdwivedi@gmail.com | [LinkedIn](#)

Skills

- **Languages:** Python, Advance Java, C++, Yaml, Json, Bash Scripting, C++, Golang
- **AWS:** ECR, Lambda, VPC, ECS, SES, SNS, SQS, SSM, Code Commit, Code Pipeline, CloudFront, CloudWatch, **EKS**, **AWS Grafana**, **AWS Prometheus**, IAM, RDS, **EC2**, **Route 53**, Load Balancer, **API Gateway**, Auto Scaling, Event Bridge, DynamoDB, **Cognito**, CloudTrail, **EFS**, Elastic Beanstalk, S3, Secrets Manager, **Code Deploy**
- **Azure:** Azure Functions, **VNet**, ACR, **AKS**, Azure Communication Services, Notification Hubs, Event Grid, Queue Storage, Service Bus, **Azure Automation**, ARM, Azure Repos, Maria DB, **Azure Pipelines**, CDN, Azure Monitor, **Managed Grafana**, Monitor Metrics, **Azure SQL Database**, Azure Database for MySQL, Azure Database for PostgreSQL, **VMs**, Azure DNS, Load Balancer, **Application Gateway**, VM, Cosmos DB, Azure AD B2C, Activity Log, **Azure API Management**, **Azure OpenAI**, **Azure DevOps**
- **GoogleCloudPlatform(GCP):** ComputeEngine, VPC Network, IAM, **GKE**, **CloudStorage**, **AppEngine**, SQL, **CloudBuild**, ContainerRegistry, Source Registry, Artifact Registry, **CloudDeploy**, **Firebase**, **Firestore**, Datastore, Monitoring, **CloudRun**, **CloudRunFunctions**, **API Gateway**
- **Monitoring tools:** **Grafana**, FluentD, **Filebeat**, **Prometheus**, Loki, Promtail, **Elasticsearch**, **Datadog**, **Monday**
- **Other Skills:** Selenium, Synk, **Docker**, Docker Swarm, **Kubernetes**, **Jira**, SonarQube, **Terraform**, **Helm**, **CircleCI**, **Jenkins**, **GitHub Actions**, **Linux**, **APIs**, Android Studio, **Linux**, **GitLab**, **DevLake**, **Kyverno**, **UptimeKuma**, **Devlake**, **Scrum Master**, **Grooming**, **Agile**, **Ansible**, **NFS**, **VPN Servers**, **Smartsheet**, **nginx**

Certificates

- **Azure DevOps Engineer Expert**
- **Azure Administrator Associate**
- **AWS Certified SysOps Administrator – Associate**
- **GitHub Actions**
- **Android Studio**

Experience / Projects

Vtechvibrant - WFH

May 2023 – Current

DevOps Engineer

- Spearheaded the design, deployment, and optimization of **multi-cloud infrastructure** across **AWS**, **Azure**, and **GCP**, enabling high availability and scalability across global environments.
- Developed and maintained complex **CI/CD pipelines** using **GitHub Actions**, **Azure Pipelines**, **CircleCI**, and **Jenkins**, automating builds, tests, and deployments across Kubernetes clusters, virtual machines, and serverless platforms.
- Implemented **GitOps workflows** using **ArgoCD** and **Helm**, enabling declarative, secure, and auditable deployments to **EKS**, **AKS**, and **GKE** clusters.
- Provisioned infrastructure using **Terraform**, **Terragrunt**, and **ARM templates**, integrating cloud-native services like:
 - **AWS:** VPC, EC2, S3, EKS, Lambda, IAM, RDS, Secrets Manager, CloudFront, EventBridge, DynamoDB, CloudWatch, Cognito, CodePipeline, CodeDeploy, EFS.
 - **Azure:** Azure Functions, AKS, ACR, VNet, Cosmos DB, Azure Monitor, Azure SQL, Application Gateway, Notification Hubs, Service Bus, Azure DevOps.
 - **GCP:** GKE, Compute Engine, Cloud Run, Cloud Storage, Artifact Registry, Cloud Build, Firebase, Datastore, API Gateway, Monitoring.
- Created custom **Docker images** and deployed containerized microservices to **Kubernetes clusters** on all three clouds with **Helm charts**, **auto-scaling**, and **zero-downtime deployments**.
- Implemented end-to-end **monitoring and alerting** using **Grafana**, **Prometheus**, **Loki**, **Datadog**, **FluentD**, **Filebeat**, and **ElasticSearch**, reducing incident detection and resolution time by over 60%.
- Automated **log shipping** and **log enrichment** from Kubernetes and VM workloads using **Promtail**, **FluentBit**, and **Logstash**, ensuring central visibility into distributed systems.
- Secured workloads using **IAM roles**, **Secrets Manager**, **SSM**, **Kyverno policies**, and integrated **Snyk** and **SonarQube** for automated **DevSecOps scans** in every PR pipeline.
- Enabled **infrastructure cost optimization** through resource tagging, **auto-scaling groups**, and dashboarding across all cloud platforms using custom Python scripts and monitoring data.
- Built and consumed **REST APIs** and internal tooling using **Python**, **Go**, and **Advanced Java** to automate common DevOps and operational workflows.
- Supported **Scrum** delivery model: conducted grooming, retros, and sprint demos; collaborated closely with QA, backend, mobile, and security teams.

DevOps Engineer

- Architected and maintained **end-to-end CI/CD pipelines** using **GitHub Actions**, **CircleCI**, and **ArgoCD**, enabling **fully automated deployments** across **Kubernetes (EKS)** environments with rollback, approval gates, and image scanning.
- Led infrastructure automation using **Terraform**, **Terragrunt**, and **modular IaC patterns**, provisioning secure and scalable **multi-account AWS environments** with support for **VPC peering**, **EFS**, **IAM**, and **Application Load Balancers (ALB)**.
- Migrated critical applications from **EC2-based deployments** to **containerized microservices**, enhancing **scalability** and reducing infrastructure costs by **30%**.
- Implemented **GitOps workflows** using **ArgoCD**, ensuring consistent, auditable, and declarative deployments across dev, staging, and production clusters.
- Developed **custom Helm charts** for Kubernetes workloads, incorporating best practices for **resource limits**, **readiness probes**, and **rolling updates**.
- Integrated **Prometheus**, **Loki**, **Grafana**, and **Alertmanager** for unified **observability** and **alerting**, significantly improving **MTTR (Mean Time to Recovery)** by over 50%.
- Set up **secure logging and monitoring** for Kubernetes using **FluentBit** and **OpenSearch**, centralizing logs across multiple namespaces and clusters.
- Established **DevSecOps pipelines** with tools like **Snyk**, **Trivy**, and **Checkov**, enforcing policy checks, image scanning, and static analysis on every PR.
- Managed **Secrets and Key Management** via **AWS KMS**, **Secrets Manager**, and **HashiCorp Vault**, maintaining strict audit compliance.
- Spearheaded automation of **cost visibility dashboards** and **resource tagging** using Python and AWS SDK, supporting FinOps and budget controls across teams.
- Collaborated with developers, QA, and security engineers in a **cross-functional Agile team**, contributing to sprint planning, code reviews, and deployment strategies.
- Designed and enforced **RBAC policies**, **IAM roles**, and **least-privilege access models** to secure cloud infrastructure.
- Led **Kubernetes node-pinning strategies** and **toleration policies** to optimize performance-critical workloads on dedicated EC2 nodes.

VTECH VIBRANT - WFH

May 2020 – Sep 2022

DevOps Engineer

- Designed and maintained **CI/CD pipelines** using **Jenkins**, **GitHub Actions**, and **GitLab CI**, enabling **automated deployments**, faster release cycles, and reducing manual errors by **90%**.
- Provisioned and managed **cloud infrastructure** on **AWS** including **EC2**, **S3**, **VPC**, **EKS**, **IAM**, and **RDS**, using **Terraform** and **Terragrunt** to achieve **infrastructure as code (IaC)** with version control and environment parity.
- Implemented **Docker containerization** for legacy and modern apps, and deployed microservices on **Kubernetes (EKS)** using **Helm charts** for automated rollout and rollback strategies.
- Built a **centralized logging solution** using **ELK Stack (Elasticsearch, Logstash, Kibana)** and **FluentBit**, enabling real-time log aggregation and faster debugging across distributed systems.
- Integrated **Prometheus** and **Grafana** for real-time **monitoring and alerting**, improving **incident response time** and ensuring **24x7 system availability**.
- Automated **configuration management** and **server provisioning** using **Ansible**, streamlining repetitive tasks like OS patching, software deployment, and environment setup.
- Enforced **DevSecOps practices** by integrating tools like **Snyk** and **Trivy** into CI/CD pipelines for vulnerability scanning and compliance enforcement.
- Managed **secrets and sensitive data** securely using **AWS Secrets Manager** and **SSM Parameter Store**.
- Performed **cloud cost optimization** by implementing **resource right-sizing**, **auto-scaling groups**, and **Spot Instances**, reducing AWS monthly spend by **25%**.
- Spearheaded **Blue-Green deployment strategy** using **AWS ALB** and **Route 53**, ensuring **zero-downtime production releases** and rollback capability.
- Collaborated closely with cross-functional teams in **Agile/Scrum** environments to ensure quick delivery of high-quality, secure, and scalable applications.

Education

- **Masters in Computer Application (MCA)** - Bangalore, India
- **Bachelors in Information Technology (BSC-IT)** - Mumbai, India

Aug 2022 – Sep 2024
 April 2018 - May - 2021
